I am writing to express my strong interest in the Lead Software Developer position at Pow.re. With over 8 years of experience as a Software Developer and a proven track record of creating successful SaaS solutions, I am confident in my ability to contribute to your team and drive the development of your platform.

Throughout my career, I have honed my skills in Go programming and have extensive experience in building and scaling microservices. I am well-versed in developing RESTful APIs and have a deep understanding of integrating frontend, backend, and external services seamlessly. My expertise in time-series databases like Prometheus and message brokers such as Kafka and RabbitMQ aligns perfectly with the requirements of this position.

As a Lead Software Developer, I have successfully led the design and architecture of complex software systems, ensuring their scalability, maintainability, and alignment with business requirements. I thrive in collaborative environments and have a proven ability to mentor technical teams, fostering a culture of excellence and delivering high-quality code.

My experience spans across various industries, including financial services and travel technology, where I have demonstrated my ability to work closely with business partners, formalize requirements, and propose innovative IT solutions. I am adept at creating accurate cost estimates, leading teams through solution delivery, and negotiating software solution contracts.

I am excited about the opportunity to leverage my skills and experience to update and extend Pow.re's existing software, develop new APIs, and enhance the scheduler component and other backend services. With my strong technical background, leadership abilities, and passion for delivering cutting-edge SaaS solutions, I am well-equipped to contribute to Pow.re's success.

Regards

Jonathan Pelletier
